Who we are

CBIE is a national, bilingual, not-for profit, membership organization dedicated to the promotion of Canada's international relations through international education. Works closely with a membership of 150 + education providers and network of strategic partners in Canada and around the globe. CBIE undertakes a series of international education activities from scholarship management, programming with global partners, research, public awareness & capacity building.

UBC, as one of the world's leading universities, creates an exceptional learning environment that fosters global citizenship, advances a civil and sustainable society, and supports outstanding research to serve the people of British Columbia, Canada and the world. UBC is ranked among the top 20 public universities in the world. We have two major campuses and work with 58,000 students from Canada and 140 countries.

Quest University Canada is Canada's first independent, not-for-profit, secular university. Quest offers only one degree, a four-year Bachelor of Arts and Sciences, and focuses entirely on excellence in undergraduate education. Quest is a fully residential campus of 700 students, class size is capped at 20 students, and students develop an interdisciplinary 'Question' rather than choosing a major. Quest has topped the NSSE results in all categories for the past four years.
